Location: India | Open to relocation across India | Open to on-site, hybrid, and remote roles

Professional Summary

BCA Data Science student (Expected 2026) with hands-on experience in machine learning, data preprocessing, and model evaluation. Built end-to-end ML and deep learning projects using Python, Scikit-learn, and CNN architectures with real-world datasets.

Experience

Data Science Intern

NULLCLASS EDTECH PRIVATE LIMITED | Remote

Jun 2025 – Aug 2025

- Worked on guided data science and deep learning tasks involving multimedia data such as images and audio
- Gained exposure to deep learning workflows including data preprocessing, model training, and evaluation using existing architectures
- Applied image preprocessing techniques such as normalization, resizing, and basic augmentation
- Analyzed model performance using standard evaluation metrics and understood overfitting and generalization challenges

Data Analysis Intern (Summer Internship)

Samatrix Consulting Pvt. Ltd. | Gurgaon, India

Jun 2025 – Jul 2025

- Worked on data cleaning, analysis, and interpretation using statistical techniques
- Performed exploratory data analysis (EDA) to derive meaningful insights from structured datasets
- Assisted in analytical reporting and supported data-driven decision-making
- Developed a strong foundation in data analysis, statistics, and professional workflow

Education

- Bachelor of Computer Application (BCA) – Data Science
Career Point University, Alniya, Kota (Rajasthan)
Expected Graduation: 2026(May) | CGPA: 7.5

Technical Skills

- Programming: Python
- Machine Learning: Logistic Regression, Decision Trees, Model Evaluation, Feature Engineering
- Deep Learning: Artificial Neural Networks(ANN), Convolutional Neural Networks (CNN)
- Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, PyTorch
- Data Analysis: Data Cleaning, EDA, Statistical Analysis
- Visualization & BI: Power BI, Excel (data analysis & dashboards)
- Concepts: Supervised Learning, Classification, Statistics,

Projects

Diabetes Prediction System

- Built classification models using Logistic Regression and Decision Trees
- Performed data preprocessing, feature selection, and train-test split
- Achieved ~78% accuracy with confusion matrix and precision-recall metrics

Heart Disease Prediction Model

- Developed an end-to-end ML pipeline for heart disease prediction

- Implemented preprocessing, model training, and evaluation workflow
- Achieved over 80% accuracy with proper validation techniques

Age Detection using CNN (UTKFace Dataset)

- Designed and trained a CNN-based model for age prediction
- Applied image preprocessing, balanced training, and overfitting control

Core Strenghts:

- Strong analytical and problem-solving skills
- Ability to interpret patterns and insights from data
- Quick learner with a structured and practical approach
- Comfortable working independently and in teams

Languages:

- Hindi – Native
- English – Intermediate
